The Hermanson Design Group

About the Hermanson Design Group and Aging in Place

Howard Hermanson and his group of skilled designers and craftsmen have received scores of awards, accolades, and recognitions for their work in the Portland area. After forty years of providing clients with unparalleled design and superior service, the Hermanson Design Group is excited to introduce a new facet of their design portfolio: Aging in Place.

Aging in Place is a design philosophy that allows homeowners to live in their own homes with specific modifications, allowing for peace of mind and increased accessibility. The Hermanson Design Group has perfected a design strategy that includes evaluating your home, identifying, and then implementing solutions for any current or future physical challenges you might incur.

If you are contemplating the hard decision of moving from your home, we urge you to consider "Aging in Place" and come to our seminar on Thursday, February 16th.

We look forward to meeting you!

Client Bathroom After

Client Testimonial:

"My husband needed a safer way to access the shower so the bathroom had to be retrofitted. We worried we would have to sacrifice style for safety but after listening to our concerns and desires, the Hermanson Design Group transformed our bathroom into a functional, safe, and beautiful room that we both love. The craftsmen in the Design Group were talented, courteous, and efficient; finishing the entire project quickly and on budget. Outstanding!"

-Kay & Don P.
